

F.A.S.T. CONFERENCE OCTOBER 2006

THANK YOU FOR BEING PART OF THE EXPERIENCE

Many thanks to all who attended our Invasive Plant Education sessions at this year's Florida Association of Science Teachers' Conference. The initiative is in its second year and is dedicated to informing Florida's next generation about the importance of native plants and the serious challenges we face from invasive plants. The project is a collaboration of UF/IFAS' Center for Aquatic and Invasive Plants and the Department of Environmental Protection / Bureau of Invasive Plant Management. **For more information: <http://plants.ifas.ufl.edu/education>**
