

Albizia julibrissin

mimosa tree

Albizia julibrissin

mimosa tree

Appearance: Perennial shrub or tree up to 10 m (13 ft) tall, spreading.

Leaves: Alternate, twice divided, pinnae 6–30, leaflets 10–40; 10–17 mm (0.4–0.7 in) long.

Flowers: Perfect; petals 5, 6–8 mm (0.25–0.35 in) long, distinct, pinkish-colored; numerous stamens, 2-3 cm (0.75–1 in) long, looks like a pink powderpuff due to the many long stamens.

Fruit: A long, flat pod, 8-15 cm (3–6 in) long, about 2 cm (0.75 in) wide.

Ecological threat:

Category I—Invasive exotics that are altering native plant communities by displacing native species, changing community structures or ecological functions, or hybridizing with natives. FLEPPC Category I

Distribution: NW, NE, C, SW

Field Notations

ALBIJULI/ALJU
