

Eugenia uniflora

Surinam cherry

Eugenia uniflora

Surinam cherry

Appearance: Evergreen, multibranched shrub or small tree to 10 m (30 ft) tall, usually shrub size in Florida; young stems often with red hairs and dark red new foliage.

Leaves: Opposite, simple, short petioled, oval to lance shaped, 2.5 – 8 cm (1–3 in) long, shiny dark green above, paler below; margins entire.

Flowers: White, fragrant, about 13 mm (0.5 in) across, with many stamens; occurring solitary or in clusters of 2 or 3 at leaf axils.

Fruit: A fleshy, juicy, orange-red berry to 4 cm (1.5 in) wide, depressed-globose, conspicuously 8-ribbed, with 1-3 seeds.

Ecological threat:

Invading hammocks in south-central and south Florida including national wildlife refuges and rare scrub habitat. FLEPPC Category I

Distribution: C, SW, SE
